PICTURE YOURSELF LIKE THIS. Last Year 300,000 Smokers Did.

Cigarettes will kill you. You hear it all the time.

But unfortunately it's not that simple. A person suffering from a smoking-related illness lives long after the disease is diagnosed.

This man has emphysema, an incurable disease linked directly to smoking cigarettes. For 18 months a machine called a volume ventilator has kept him

alive. The ventilator does his breathing for him. Doctors performed a tracheotomy so a tube can go from a hole in his throat to the mechanical lung. He is so oxygen-starved he hasn't the strength to lift a toothbrush. Or strike a match.

The next time you light up, don't worry about dying. Worry about living.

It can be a fate worse than death.

A Public Service Announcement from Hustler Magazine.
